2015-06-23 CGSync Meeting notes

Date

📅 23 Jun 2015 10:30

Attendees

- Thomas Cherry
- Christopher Gokey
- Chris Durbin

Goals

- progress with facets, when to move on query --cg
    - GCMD needs support for science keywords and freetext, CMR can have it by monday (29th)
- platform-instrument facet differences
    - how will platform-instruments, should instruments be their own lists
    - more talk is needed, we should wait on these and talk about having different indexes.
- delete api, where is it? --tc
    - CMR-686 talks about this, until then use the ECHO API
- version, how is it handled, looks like version is appended to the end of short name.
- https://cmr.sit.earthdata.nasa.gov/search/site/api_docs.html is down a lot (like today) --tc

http://173.14.135.125/KeywordSearch/KeywordSearchTest.html

GCMD

* facets ; datacenter, locations, projects, platfrom-instrument

* metadata view

* UMM based response from CMR

* spatial-temporal

CMR

* query language

* facets - datacenter

* limit depth of facets (ticket exists)
